IN THE SPECIFICATION:

The specification as amended below with replacement paragraphs shows added text with <u>underlining</u> and deleted text with ~~strikethrough~~.

Please REPLACE paragraph [0072] on page 19 with the following amended paragraph:

[0072]   In the above example of the mark-up document INDEX.XML, "ParentalLevel" that has been described above is used <u>as</u> a property for reading a currently set parental level, and ways to represent documents appropriate for their parental levels are written in the script language using simple if-sentences.
